

## G5. Mitigating Pathways of Invasion

**Goal 5:** *PRISM has a coordinated program to prevent species introduction by focusing on pathways.*

Priority Strategies (ranked):

1. Public/local government engagement/coordinating partners
2. Education and outreach
3. Managing priority species strategically

Dependencies

1. Lists of prioritized species from other groups
2. Piggyback on other group surveys
3. Utilize education and outreach methodologies developed by other groups

| <b>YEAR ONE (2014)</b>  |   |   |
|---|---|---|
| Objectives  | Actions   | Outputs   |
| <b>5.1</b> Significant pathways and targeted audiences are identified and prioritized           | <b>5.1.1</b> Gather information on what the pathways are, including polling internal and external partners and researching literature. Develop and execute a partner survey to determine pathways | <b>5.1.1a</b> List of pathways  |
|   | <b>5.2.1</b> Analyze and compile survey data. Determine method of prioritization for PRISM work.  | <b>5.2.1a</b> Prioritized list  |
|   | <b>5.3.1</b> Develop and execute a partner survey to determine audiences.   | <b>5.3.1a</b> List of audiences   |
|   | <b>5.4.1.</b> Prioritize audiences  | <b>5.4.1a</b> Prioritized audiences   |
|   | <b>5.5.1</b> For each pathway determine several ways of mitigating or preventing the spread of each of the priority species   | <b>5.5.1a</b> Prioritized strategies for each pathway and species combination |
| <b>5.6</b> Determine strategies for audiences; we are prepared for outreach to those audiences. | <b>5.6.1</b> For each audience determine several ways of reaching them in coordination with education and outreach group  | <b>5.6.1a</b> Prioritized strategies for each audience                        |
