answered question	48
skipped question	0

3. Educating about invasive species by ...

		Response Percent	Response Count
Holding conferences or seminars		39.5%	17
Giving general talks regarding issues of invasives		76.7%	33
Holding training classes on ID or management		69.8%	30
Teaching children's programs about invasive species		20.9%	9
Teaching course sections at high school or college-level		7.0%	3
Issuing newsletters with articles on invasives		55.8%	24
Producing fliers or brochures specific to invasives		37.2%	16
Tabling at events with informational materials		37.2%	16
Hotline operation/information resource		18.6%	8
Writing press releases or newspaper articles		46.5%	20
Producing video shorts (e.g. youtube)		2.3%	1
		Other (please specify)	14
answered question			43
skipped question			5

4. Outreach to... (with message about invasive species)

		Response Percent	Response Count
Members of general public		84.8%	39
Private landowners		56.5%	26
Environmentally involved constituents (volunteers, gardeners, hikers, boaters, etc.)		80.4%	37
Press/media		41.3%	19
Schools, teachers, students		50.0%	23
Businesses, commercial interests (e.g. nurseries, pet stores, camping stores)		15.2%	7
Local government agencies or officials		45.7%	21
County government agencies or officials		32.6%	15
State government agencies or officials		23.9%	11
Federal		8.7%	4
	Other (please specify)		5
answered question			46
skipped question			2

5. Collaboration (specific IS projects or activities you have planned)

		Response Percent	Response Count
Working jointly with other organizations on IS activities with shared resources		88.6%	31
Lending or borrowing equipment or supplies		40.0%	14
Lending or borrowing space to/from other organization(s) for staff workspace, storage, or workshops		37.1%	13
Providing on-site access to software (e.g. ArcGIS, internet access) to other organization(s)		2.9%	1
answered question			35
skipped question			13

6. Recruiting volunteers to...

		Response Percent	Response Count
Remove invasive plants		79.5%	31
Survey for invasive plants		56.4%	22
Remove invasive aquatic organisms		10.3%	4
Survey for aquatic organisms		12.8%	5
Survey for forest insect pests		30.8%	12
Teach about invasive species		30.8%	12
Plant natives		61.5%	24
	Other (please specify)		3
answered question			39
skipped question			9

7. Approximate number of volunteers you expect will work for you in 2014 on IS work

	Response Count
	36
answered question	36
skipped question	12

8. Engaging temporary/seasonal help (for IS work)...

		Response Percent	Response Count
SCA, AmeriCorps		32.1%	9
Seasonal position		67.9%	19
Professional / expert / contractual		46.4%	13
Number of positions			23
answered question			28
skipped question			20

9. Applying for funding (grants, etc.) for...

		Response Percent	Response Count
Invasive species treatment/control/removal		75.9%	22
Support of IS training classes, workshops, seminars, conferences		27.6%	8
Comprehensive land management (incl. IS mgmt, restoration, etc.)		69.0%	20
Staffing for IS mgmt (incl. part-time, seasonal, interns, etc.)		41.4%	12
answered question			29
skipped question			19

10. Working to draft legislation or regulations regarding IS for...

		Response Percent	Response Count
Municipalities		80.0%	4
Lake Associations, land owners associations		20.0%	1
	Other (please specify)		1
answered question			5
skipped question			43

11. Performing enforcement or inspections at...

		Response Percent	Response Count
Ports, Boat Launches		75.0%	3
Nurseries, plant materials		25.0%	1
Crops		0.0%	0
	Other (please specify)		3
answered question			4
skipped question			44

12. Advocating for IS regulations or legislation

		Response Percent	Response Count
Municipal level		53.8%	7
State level		69.2%	9
Federal level		7.7%	1
answered question			13
skipped question			35

13. Supporting IS research through

		Response Percent	Response Count
Coordinating citizen science data collection programs		41.7%	15
Submitting data to iMapInvasives database		77.8%	28
Partnering with universities, graduate students		44.4%	16
Issuing small grants		2.8%	1
Conducting original research		38.9%	14
Publishing research		19.4%	7
Other (please specify)			8
answered question			36
skipped question			12

14. What species will be researched in 2014? [If too many to list, just write "Many"]

	Response Count
	33
answered question	33
skipped question	15

15. Surveying for and/or monitoring invasive species

		Response Percent	Response Count
On land that my organization manages		69.8%	30
Within waters that my organization manages		32.6%	14
On (other) public lands		48.8%	21
Within (other) public waters		7.0%	3
On private lands (e.g. for private landowners, homeowners associations, another landholding agency)		39.5%	17
Within private waters (e.g. for lake associations, private landowners)		9.3%	4
	answered question		43
	skipped question		5

16. What types of habitats will surveying and/or monitoring occur in?

		Response Percent	Response Count
Deep water habitats (marine, estuarine, rivers, streams, lakes, ponds)		30.8%	12
Wetlands (swamps incl. lowland forest, marshes, bogs, fens)		76.9%	30
Open Uplands (grassland, heathland, shale cliff, talus slopes, balds)		56.4%	22
Upland Forests		84.6%	33
Terrestrial Cultural Land (orchard, urban lots, road sides)		53.8%	21
	Other (please specify)		4
answered question			39
skipped question			9

17. Area (within the PRISM) in which surveying/monitoring will occur

		Response Percent	Response Count
Single property or single municipality		33.3%	14
Multiple properties, single county		38.1%	16
Multiple counties		40.5%	17
answered question			42
skipped question			6

18. Approximate gross area (acres) of land or waters in which some surveying/monitoring will be done within the PRISM

	Response Count
	38
answered question	38
skipped question	10

19. Will you be able to provide data on the geographic location of the area where your organization conducts surveys or monitoring? (e.g. GIS shapefile, or GPS boundary points)

		Response Percent	Response Count
Yes		82.5%	33
No		17.5%	7
		answered question	40
		skipped question	8

20. Do you intend to submit records to iMapInvasives as part of your survey/monitoring work in 2014?

		Response Percent	Response Count
Yes		52.3%	23
No		11.4%	5
Would be willing (but don't know how, or need help)		36.4%	16
		answered question	44
		skipped question	4

21. Survey/monitoring work will be done via ...

		Response Percent	Response Count
Volunteer work		67.4%	29
Full-time Staff		65.1%	28
Seasonal or intern work		72.1%	31
Professional /expert/ contractual		32.6%	14
answered question			43
skipped question			5

22. What is the goal of monitoring work?

		Response Percent	Response Count
Impact of invasive species on target native species (e.g. ash trees, or endangered species), community or ecosystem		71.4%	25
Pre-invasion monitoring of target native species (e.g. ash trees for EAB, or endangered species), community or ecosystem		54.3%	19
Long-term target native species, community or ecosystem changes after invasive species has been eliminated or reduced.		60.0%	21
Long-term community or ecosystem changes following invasive species removal and restoration.		65.7%	23
Other (please specify)			5
answered question			35
skipped question			13

23. What is the scope of surveying?

		Response Percent	Response Count
Single species		9.5%	4
Small set of species		38.1%	16
Large range of species		57.1%	24
		answered question	42
		skipped question	6

24. What species will be surveyed for? [If "Large range", just write "Many"]

		Response Count
		41
		answered question
		41

Page 9, Q40. Other:

1	I tried to limit my responses to PIPC led projects and did not include activities planned by Bob O'Brien and his OPRHP Invasives Program, though we frequently collaborate. We also facilitate a number of invasive researchers working on parkland that are perhaps not fully captured by this survey. Most of the work is focused on the PIPC system (ca. 110K acres), though some projects are more regional (e.g., MaM Biocontrol, Golden-winged Warbler Habitat Restoration thru Phrag management. 2	Crayfish control/monitoring	Jan 28, 2014 7:33 AM
3	EAB Outreach to municipalities in Putnam County, ongoing Facilitate iMap invasive trainings Facilitate first detector trainings IS trainings for Master Gardener Volunteers (85 people)	Jan 27, 2014 1:19 PM
4	On Saw Mill River Audubon sanctuary and also focus on landfill grasslands at Croton Point County Park.	Jan 27, 2014 12:59 PM
5	SWARM: we launched a new event bringing vine cutting groups together to make a big difference in one place. We did this in November 2013 and had 175volunteers show up. Another is now in planning stages for March 2014. Anticipate one every 3-4 months; No "regular" biodiversity assessments--still have work to do to get results out from BioBlitz held in 2009 and various surveys by County naturalists of 2-3 specific areas; grants/corporate/muni sponsors for watershed--new direction as currently have no funding for non-Yonkers part of watershed (2/3 of watershed outside Yonkers)	Jan 27, 2014 11:11 AM
6	Grant writing to support IS management	Jan 24, 2014 7:35 PM
7	Monitoring Phragmites & other weeds in a degraded fen managed for bog turtle habitat	Jan 24, 2014 4:48 PM
8	This year the Taconic/Palisades Region will have one 4 person invasive species strike team performing manual removal projects throughout the summer. Projects have not yet been selected, but controls and a few surveys will occur on an undetermined amount of the 145,862+ acreage owned by Parks within the PRISM.	Jan 24, 2014 11:26 AM
9	We are monitoring vegetation in deer exclosures throughout the Hudson Valley.	Jan 24, 2014 9:57 AM
10	Survey and assessment are part of a citywide effort to assess all our natural areas. Bronx and Manhattan portions are represented in this survey.	Jan 23, 2014 5:07 PM
11	We are at the beginning of this effort ...	Jan 15, 2014 7:48 PM
12	We have an active Forest Health Unit in albany that we support in the region. Don't Move Firewood, etc...outreach at Ulster Co and other fairs. Mowing/control of swallowwort at Castle Rock (40 acres), some continuing monitoring of Mile-a-Minute biocontrol wheevil at Stewart State Forest, Water Chestnut monitoring/control on ponds at Stewart State Forest, Knotweed and ailanthus monitoring/cutting at Stewart State Forest. Naja Kraus continuing Giant hogweed and Kudzu monitoring/control.	Jan 15, 2014 4:42 PM
13	we're also interested in/involved in prevention work to slow the arrival and	Jan 14, 2014 2:34 PM

Page 9, Q40. Other:

spread of non-native species

14	Scenic Hudson was working with OPRHP to map and assess Fishkill Ridge for a potential invasive species prevention zone. However impending transfer of the SH parcels to OPRHP may change the nature of that project	Jan 14, 2014 11:42 AM
